

KUNAL BISHWAL

Master Company Target List — 2026 / 2027 Placement & Internship Search

353 curated companies • Official career-page links • S/A/B priority • Full Stack / SDE / Backend / AI/ML / GenAI focus • Quant/HFT excluded

Profile	B.Tech CSE, SRM Institute of Science and Technology • Graduation: May 2027 • CGPA: 9.65
Primary lanes	Software Engineer / SDE / Full Stack / Backend / AI Engineer / Applied AI / ML / GenAI
Core stack	Python, Java, JavaScript/TypeScript, React, Next.js, Node.js, Flask, FastAPI, Spring Boot, PostgreSQL, MongoDB, AWS, Docker
AI stack	TensorFlow, Keras, PyTorch, CNN, Transfer Learning, Transformer architectures, AI APIs, voice AI
Search philosophy	Prioritize student/2027 internships and entry-level roles; also monitor PPO/FTE pipelines and 0–2 year openings.
Exclusion	Quant research, quant trading, HFT/trader-first roles and quant-only employers are excluded from this list.

How to use this list

- **S — Highest priority:** strongest combination of resume fit, engineering relevance and likely value for your placement profile.
- **A — Strong target:** very relevant companies; apply when a current JD matches your experience and eligibility.
- **B — Secondary target:** useful for increasing application volume; tailor only when the JD is genuinely aligned.
- Open the **Career Page** link and search for: Software Engineer Intern, SDE Intern, Software Engineer I, Full Stack, Backend, AI Engineer, ML Engineer, Applied AI, GenAI, LLM or equivalent.
- A career page is a **live destination**, not a promise that a role is open today. Re-check before applying because postings close, move or change eligibility.

Resume evidence used for targeting

The matching strategy is based on the supplied resume: full-stack/backend engineering with Python, Java and JavaScript/TypeScript; React/Next.js; Node.js/Flask/FastAPI/Spring Boot; REST APIs; AWS and Docker; PostgreSQL/MongoDB; AI/ML with TensorFlow/Keras, CNN and transfer learning; and projects including ChickTech-AI, Ascend Career and Synapse UI. The resume also reports a

full-stack internship with 20+ REST endpoints, Docker/AWS deployment and CI/CD, plus a 98.2% computer-vision detection result.

Top 50 — Start Here

These are the first companies I would check for your profile. Priority is based on resume fit, not a guarantee of an open vacancy.

Application Strategy for Kunal

Step	Action	What to do
1	Run three parallel searches	SDE/Full Stack (largest pool), AI/Applied AI/GenAI, and ML/CV.
2	Prioritize student pipelines	You graduate in May 2027, so internships and 2027 graduate pipelines should be the default target.
3	Use the right resume angle	Lead with full-stack/product engineering for SDE roles; lead with ChickTech-AI + AI integrations for AI/ML roles.
4	Search ATS + company pages	Do not rely on LinkedIn alone. Search the official career page and ATS for the exact title.
5	Tailor only when justified	Change summary/skills/project ordering to match the JD; do not rewrite the entire resume for every application.
6	Track deadlines	Record posting date, deadline, eligibility, location, referral status and application status in your job-hunt tracker.

Research note: this document is a curated target-company universe, not a claim that every company has a suitable opening today. Career pages and ATS postings change frequently. Always verify the current JD, graduation-year eligibility, location, work authorization and deadline immediately before applying. Quant/HFT/trading-focused employers and roles were intentionally excluded.

Current verification examples from official/company career sources: Amazon currently lists a 2027 six-month SDE I internship in India; Atlassian's India early-career page states recruiting runs July–December and its internship targets students in their second-to-last year; PhonePe's careers page exposes Engineering and Intern filters; Sarvam AI currently lists engineering roles including backend, frontend, ML and AI infrastructure; Freshworks has a dedicated Product & Engineering career track; Nanonets has an official Greenhouse board; and Observe.AI has an official careers page.
